# How we have proceeded .....

Process based on: transparency, technical data and governance, including members (with Chambers balance) of:

- Standards Development Group (SDG) – Native Forest
- A group of IFL stakeholders created in the National Assembly
- Board of Directors
- Brazilian government: Brazilian Forestry Service

2015

- Election of SDGs
- IFL Solutions Forum
- IFL Workshop in Brazil
- Meetings of SDG

2016 Jan. – Jun.

- 1st public consultation of IFL indicators in Brazilian Standards realized
- 2 online meetings of informal IFL Amazon working group (FSC Bolivia, Brasil and Peru)
- Letter of Brazilian member to FSC IC about the importance of RIL and key concerns around M65
- Meetings of SDG

2016 Jul. – Dec.

- IFL Solution Forum in Germany
- IFL Side meeting during Latin American Regional Meeting
- 2nd draft of national standards in Brazil ready waiting for IFL IGI
- Webinar to discuss IFL Advice Note in Brasil and Latinoamerica
- Meetings of SDG
- Field tests articulation

2017 Jan. – Set.

- Draft of IFL IGI released – SDG decided to wait formal approval to work on the national indicators
- IFL Stakeholders Group created at the National Assembly – FSC Brazil
- Brazilian Tropical Forest Managers Meeting and discussion about IFL
- Regional Workshop with focus on standard development process
- IFL's motions inter chambers discussion
- **SGD agenda and workplan approved to propose and discuss IFL indicators**

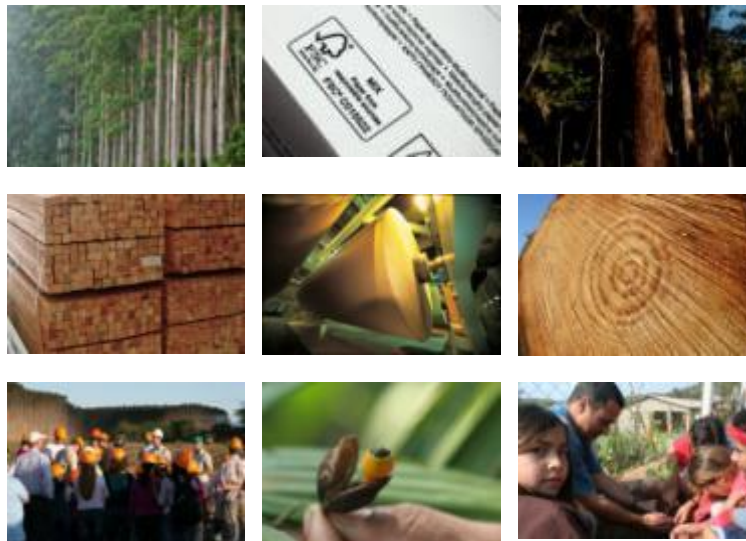

# ..... and where we are concerning the Motion 65 Implementation

Desired outcomes	Main activities	2017			2018								
		out	nov	dez	jan	fev	mar	abr	mai	jun	jul	ago	set

	Elaboration of draft of version 4 including stakeholders feedback												
Final version	Discussion and approval of final version by SDG and BoD												
	Final version for FSC IC												
Monitoring and Evaluation	Monitoring of workplan and budged												

# What we already know .....

- FSC certification is an important tool for IFL conservation in the Brazilian Amazon. National Indicators that strengthen excellence in RIL, with reinforced technical support **will be proposed and tested**, referenced for the IGI's (to be approved by the Board).
- FSC means governance and legislation reinforcement in Brazil, in public and private areas.
- Forest certified areas are barriers against deforestation vectors.
- FSC certification assures the Legislation execution and the continuous improvement of the organizations' social and environmental performance.
- In the Brazilian Amazon, the conservation agenda shall focus in the fight against illegality and in the implementation of protected areas. Increase the legal and certified tropical timber offer, is a brazilian forestry policy goal and can contribute with the IFL conservation agenda, having as a parameter the FSC forest certification.
